B. INDEXING DATA

14. SUBJECT AREA

15. TYPE OF ENDEAVOR: report

16. INDEXING TERMS (6-12): farm workers; production; migrant labor; labor demand; principal crops

17. ABSTRACT (MAX. 250 WORDS)

Depicted are 12 charts of major crop production centers in the United States which demand the labor of migratory farm workers throughout the year. Each chart illustrates the areas of agricultural migrant labor demand for one month of the year. The purpose is to acquaint the public with the complexity of placing and scheduling migratory workers under the Annual Worker Plan, which furnishes employers with experienced labor forces when needed and provides continuity of work for laborers.

Crops using large numbers of farm workers include apples, berries, cherries, citrus, nuts, peaches, fruits, beans, corn, peas, potatoes, tomatoes, vegetables, cotton, hay, small grain, specialty crops, sugar beets, sugarcane, and tobacco.

Agricultural workers should contact local state employment services before traveling to areas of demand unless they have specific jobs awaiting them.

Major Agricultural Migrant Labor Demand Areas

(By Month and Principal Crops)

The information in this booklet is designed to acquaint the public with the complexity of placing and scheduling domestic migratory agricultural workers under the Annual Worker Plan--an Employment Service technique to provide continuity of employment to migratory farm workers and to furnish employers with an experienced labor force when needed.

The twelve charts in this booklet show the major crop production centers in the United States where, each month, migratory agricultural workers are usually employed to supplement local farm labor.

The State employment agencies, affiliated with the United States Employment Service, furnished the information for compiling these charts.

There is no attempt to indicate the number of out-of-area workers employed within these areas, or the exact duration of their stay. Activity in any crop, as shown on these maps, could be starting, at its peak, or near completion during any month shown. For specific information of this type, Farm Labor Service publishes five crop work guides by geographic area, a wall map titled "Peak Seasonal Farm Labor Force and Crop Production Centers by Agricultural Reporting Area," and a booklet, "Crops Requiring Seasonal Hired Workers." These latter two publications supplement one another.

All crops or crop areas are not included. Only the areas utilizing significant numbers of migrant farm workers are shown. In these areas are grown:

1. Apples
2. Berries (general)
3. Cherries
4. Citrus
5. Nuts
6. Peaches
7. Fruits (not otherwise listed)
8. Beans
9. Corn (canning)
10. Peas
11. Potatoes
12. Tomatoes
13. Vegetables (not otherwise listed)
14. Cotton
15. Hay
16. Small grain
17. Specialty crops
18. Sugar beets
19. Sugarcane
20. Tobacco

Distribution of this booklet should be limited to operating farm labor personnel and the inquiring public interested in the information contained in the following twelve charts. It is not intended as a composite guide for migrant workers. Area work guides and individual State work guides are for this purpose. Agricultural workers expecting to travel should contact the nearest office of the State employment service as the best source of current information on farm job opportunities.
